C² SERIES Window

The beauty, design and style of the C² SERIES is built, crafted and made with pride in the USA.

Replacing your windows has many benefits to your home such as; boosting its beauty, giving it an added custom design touch and will transform your homes curb appeal all the while reducing energy costs and increased comfort. The C² SERIES is built to resist whatever mother nature can throw at it.

6 REASONS

Homeowners Replace Their Windows

Beauty and Design. Newly designed windows add curb appeal and increase value while reducing outside noise.

Security. Older windows lack strength and proper security measures from intruders.

Increased Value. New windows increase value by adding strength, beauty and security.

Ease of cleaning. Older windows are harder to clean and unsafe.

Eliminating costly maintenance.

Old wooden, storm or vinyl windows are costly to maintain.

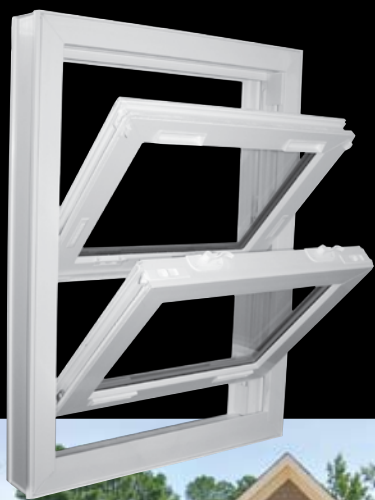

#1 Energy-efficiency and Performance.

All the above are great reasons, but the #1 reason homeowners replace their windows is to save the maximum amount of money they pay on energy bills from heating and cooling their home.

C² SERIES Double Hung Windows

Windows are the eyes of your home, allowing you to see the world outside while adding beauty, value and efficiency. The C² SERIES double hung windows are built with performance in mind. They feature tilt-in sashes for ease of cleaning making maintenance a thing of the past. Each window is built with security in mind featuring

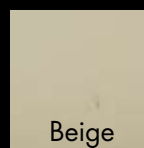

dual vent locks with low profile cam action locks. All our windows come in three exterior colors options and three interior woodgrain finishes.

Exterior & Interior

C² SERIES Casement Windows

The C² SERIES slider windows Undeniably distinctive. Unmistakably European. Irresistibly charming. Many homes just wouldn't look the same without the romantic touch of casement windows. While well-loved for their looks, casement windows of years past were notoriously poor performers when it came to keeping out cold, wind and rain.

Unobstructed clean look.
Our fold down handles are
the perfect solution.

C² SERIES Awning Windows

The C² SERIES In-swing and Out-swing Awning Window are specially designed awning windows making it easier to reach when opening. So when replacing the windows in your home, it's very important to remember the basement or those areas where you want additional air flow. They're built and designed with the same energy-saving specifications as all our window systems.

C² SERIES *Slider Windows*

The C² SERIES slider windows offer a classic design that lends itself from contemporary to modern style homes. Slider windows add protection from the outside elements and can be customized with hardware and grid options.

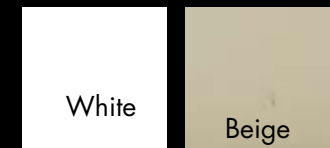

C² SERIES *Picture Windows*

The C² SERIES Three Lite Full View End Vent fills your home with natural light and creates a large canvas for beautiful views with elegance, efficiency and security. With a reinforced structural center lite as the foundation, the C² SERIES is the strongest and best performing end venting window in the industry.

Casement	.28	.28

*Energy savings can be enhanced by adding Krypton Gas between panes.

ELIMINATE DRAFTS

The C² SERIES windows meets and exceeds the air filtration rating specified by the American Architectural Manufacturers Association (AAMA) at .07 cfm. Their required rating is .30 cfm.

Performance criteria for windows is based on ratings certified by the National Fenestration Rating Council (NFRC), and vary for each of the climate zones shown in the map above.

C² COMPOZIT SERIES *Frame Features & Options*

Dual vent locks allow you to enjoy the outside air while keeping your home safe and secure.

Recessed tilt latches offer streamlined appearance and ease of operation

Overlapping sill dam leg for reduced air infiltration. This also increases structural support.

Multi-chambered profiles for optimum energy savings.

C² FORCE
COMPOSITE REINFORCEMENT

The C2 SERIES offer comes standard with **C² FORCE COMPOSITE REINFORCEMENT** in the meeting rails of the window. This feature offers a host of advantages compared to the aluminum reinforcement that is used in other windows. Additionally, **C² FORCE** is stronger than all other non-metallic reinforced windows.

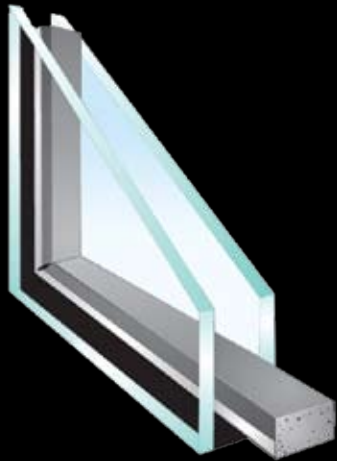

These superior features include:

- High tensile strength of this material will not warp.
- Provides better resistance to impact.
- Low conduction of heat/cold, creates optimal thermal performance.
- Does not attract condensation like aluminum.

The **C²** SERIES offers optional **ecoINSULATION** material in both the window frame and sash. Rarely, if ever, will you find a window manufacturer that insulates both frame and sash.

Filling multiple chambers in the frame, as well as the sash, creates an even stronger weather barrier that you will not find in other windows. This feature provides the added benefit of easing your energy consumption and keeping your home comfortable year round.

Whether you're in the north or south we go the extra mile to insure maximum comfort and low energy consumption.

The **C²** MAX SPACER SYSTEM is an insulating glass edge seal system constructed using a unique Composite Laminating Technology. It's pre-assembled with proven components, sealant, spacer and desiccant to create a high-performance, durable single seal spacer system.

Sloped sill to help keep window clear of debris while assisting in water drainage.
