

Patio Doors

By Primax Composit Home Systems

Fully Fusion Welded

Fully welded vinyl frame and sashes create one solid, cohesive unit that withstands the harshest window and structural loads.

Metal Reinforcement

All PVC hollow stiles are reinforced with thick mill aluminum or steel for extra strength.

Integral Interlock

Deep pocket integral interlock gives extra protection against air infiltration.

Frame Protection

Integrated channel bumper offers protection to the frame by not allowing the operable sash to slide too far.

Customer Configurations

Door width ranges from 5' to 8' with a standard height of 79.5", but widths, heights, and number of panels can be customized to fit your needs.

Safety and Security

All doors come standard with tempered safety glass, that is 4x stronger than regular glass for enhanced safety and security.

Completely Weathertight

Double-fin weather stripping at the interior & exterior barriers protects against air and water infiltration, creating a tight seal, which heightens energy efficiency.

Exceptionally Tight Screens

Heavy-duty extruded aluminum screen is 10x stronger than roll form and features inset locking handle for increased security.

Fully Secure

Keyed single-point or multiple-point locks are exceptionally secure. Foot locks are also available for extra protection.

Effortless Operation

Concealed, tandem zinc-plated steel rollers provide rust-free, smooth, and effortless operation.

Multi-Chambers Extrusions

Engineered frames feature multiple chambers for structural performance and improved efficient thermal barriers.
